

PDF TO CSV / TXT SAMPLE DOCUMENT

This is a clean, text-based PDF created for testing.
It contains normal paragraphs, line breaks and punctuation.

SECTION 1 - INTRODUCTION

This document is intentionally simple. It is designed to validate that text extraction works correctly without OCR, custom fonts or layout tricks.

SECTION 2 - CONTENT

You should see each sentence appear on its own line in TXT output, and as one row per line in CSV output.

SECTION 3 - EXPECTED RESULT

If this file converts cleanly, your tool works for standard Word or Google Docs PDFs.
